

## OBJECTIVE

To pursue a challenging career where I can apply my existing knowledge, acquire new skills, and contribute effectively to the organisation.

## EDUCATION

| Qualification                         | College / School                          | University / Board                                         | Duration       | Percentage |
|---------------------------------------|-------------------------------------------|------------------------------------------------------------|----------------|------------|
| MCA (Master of Computer Applications) | Heritage Institute of Technology, Kolkata | MAKAUT(Maulana Abul Kalam Azad University of Technology)   | 2023 - Present | 91.9       |
| B.Sc. (Computer Science)              | Gurudas College, Kolkata                  | University of Calcutta                                     | 2020 - 2023    | 81.17      |
| Higher Secondary (10+2)               | Modern School, Kolkata                    | WBCHSE (West Bengal Council of Higher Secondary Education) | 2018 - 2020    | 82.8       |
| Secondary (10)                        | Modern School, Kolkata                    | WBBSE (West Bengal Board of Secondary Education)           | 2005 - 2018    | 80.71      |

## PROJECTS

### Public Opinion Profiling of Celebrities through Bengali Social Media Texts

- A major postgraduate project undertaken by a team of four students aimed at analyzing public sentiment expressed in Bengali YouTube comments about celebrities using machine learning techniques.
- Role: Team Lead – responsible for data scraping, model training, and sentiment analysis
- Algorithms Used: FastText, BERT

### Comparative Study of Machine Learning Models for Bengali News Classification

- A minor postgraduate project conducted by a team of five students as a comparative study of machine learning models for classifying Bengali news articles into categories such as politics, sports, entertainment, and technology.
- Role: Data Cleaning, Data Preprocessing, Model Training
- Algorithms Used: Long Short-term Memory(LSTM), Naive Bayes, Random Forest, Logistic Regression

### BoiiMela(Android Application)

- An undergraduate project developed by a team of three students. BoiiMela is an Android application designed to facilitate the buying and selling of second-hand books.
- Role: Team Lead – responsible for backend development and database management
- Technologies Used: XML, Java, Firebase

## TECHNICAL SKILLS

- Languages - Java, Python
- Tools - Android Studio, Eclipse, Google Colab
- Databases- MySQL, Firebase

## EXTRA-CURRICULAR ACTIVITIES

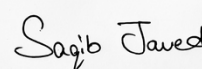

- Mentor – GirlsScript Summer of Code (GSSoC) '24 Extd  
Guided a Stock Price Prediction project during the month-long open-source program in October 2024.
- Participant – HackHeritage 2024  
Prototyped a chatbot concept and successfully built the image captioning module during a 24-hour hackathon, applying computer vision and NLP techniques.

## ACHIEVEMENTS

- Bronze Medalist – B.Sc. Computer Science 2023
- Top 50 Mentor – GSSoC '24 Extd
